SERVICE & MAINTENANCE

BUILDING MANAGEMENT SYSTEM

A Building Management System (BMS) is a control system that manages and controls the mechanical and electrical services of a building. With many years of experience in Building Management Systems, we provides automatic controls and control panels for the buildings which ranges from design, integration, to maintenance and servicing for many sectors. Our successful BMS integration and operation helps our clients to optimise building performance substantial energy savings to be achieved. If it is a new BMS system or an upgradation in existing system, It is therefore important to ensure that the BMS is properly designed and specified and that the procurement process is closely controlled, for that we have significant commitment to pursue the BMS project.

01 ENERGY MONITORING SYSTEM

02 CHILLER MANAGEMENT SYSTEM

EXTRA LOW VOLTAGE SYSTEM

With the technological evolution, Extra Low voltage system is an accepted solution to increase the productivity of a business. Our ELV systems includes all the systems in a building which operate on low voltage – Intercom/PABX, cabling, CCTV, fire alarm, access control, public address system, audio-visuals, fiber optic cabling, smart home systems, etc. Our team of engineers and experts provide design, integration and implementation services to our clients incorporating the latest technologies to available in the industry.
